

Electronic Technician

Norbar Torque Tools Ltd., the world leading torque tool manufacturer is looking to appoint an Electronic Technician to join the calibration team.

The successful candidate will be required to calibrate a range of torque measuring equipment to company standards in our accredited laboratory. This will involve lifting and applying weights to calibration equipment, making adjustments as required and recording the results which will be used to produce calibration certificates.

The role also involves the set up/repair of electronic instrumentation to the required tolerances and fault finding to component level.

Attention to detail to meet quality standards is essential, together with the ability to think laterally in problem solving.

An electronics ONC/OND or equivalent would be an advantage but is not essential as training would be given.

In return for a 38½ hour week we can offer a starting hourly rate between £13.62 - £16.01 dependent on qualifications and experience.

Norbar also offers a non-guaranteed profit related bonus, generous contributory pension scheme, life assurance, an award winning restaurant plus other lifestyle benefits.

Closing date for applications: Friday 26 November 2021
