

Temporary Assembly Operatives

How does a 4 ½ day working week sound?

Due to increased demand for our products we are looking for temporary staff to work in Torque Wrench Assembly. These roles are initially available until 30 June 2023.

Duties will include assembling a range of torque wrenches and sub assemblies to a high standard using light machinery and tools and calibrating each one using computer based test equipment. You will also be required to laser mark product and pack wrenches with certificates and instructions for customers.

You will ideally be able to demonstrate previous assembly experience on a production line, where working at speed to meet daily output is required identifying any quality issues with small components or processes. You will be a highly motivated individual who has the ability to work both within a team and on an individual basis.

Working in a state-of-the-art factory, we remain committed to our mission of being a great place to work. We offer fixed shifts and **our standard day shift is 7:30 am to 4:30 pm Monday to Thursday with a 12.00 pm finish on a Friday!** (If that shift pattern doesn't work for you though we are happy to discuss alternative shift patterns between 6.00 am and 4:30 pm).

We can offer an hourly rate of £12.19 as well as a non-guaranteed profit related bonus, generous contributory pension scheme, life assurance, an award winning restaurant plus other lifestyle benefits.

Please note that a rate of £11.58 will be paid during the initial training period (approximately 6 weeks).
